Experience

Verizon

11 years 9 months

DMTS Product Manager – AI Transformations - Digital & Customer Care

January 2019 - June 2026 (7 years 6 months)

Greater Philadelphia

- Defined the strategic product vision and multi-year roadmap for enterprise-scale omnichannel platforms, emphasizing digital-first self-service capabilities that boosted operational ROI by 20% across business segments.
- Led the digital plan-change journey in Verizon's— enabling the full existing-customer base to migrate to a new lower-cost plan across web and app; drove requirements through launch certification with plan, pricing, and engineering teams.
- Led the entire product lifecycle & GTM strategy for key FinTech and regulatory initiatives, launching the Verizon Visa Credit Card, digital reward/ payment flows, and the CCPA compliance framework, which transformed the loyalty experience for more than 35M+ customers.
- Led product strategy and execution for Verizon's myPlan Configurator & Perk Engine across 2 scrum teams, launching modular plans to 10M+ monthly users while driving a 22% increase in perk attachment rates and a 14% drop in support inquiries.
- Spearheaded the end-to-end e-commerce upgrade for BYOD checkout and digital trade-in flows—driving \$120M+ in device sales while boosting mobile conversion by 19% and cutting trade-in support tickets by 28%.
- Championed continuous journey discovery through data-driven OKRs and predictive analytics to eliminate customer friction points, driving a 7-point Net Promoter Score (NPS) increase across omnichannel touchpoints.
- Productized AI-driven web self-service workflows within the Verizon Assistant chatbot and account dashboard, automating bill-shock explanations and troubleshooting to divert 1.2M high-volume customer care calls annually.
- Spearheaded the product roadmap and web integration for Verizon's Digital-First eSIM Activation Engine, removing physical SIM card shipping

delays for Bring Your Own Device (BYOD) customers and driving a 22% increase in instant digital line activations.

Manager – Customer Experience & Voice of Customer Ops
October 2014 - January 2019 (4 years 4 months)

Basking Ridge, NJ

- Portfolio Backlog Prioritization: Governed a \$70M+ enterprise product portfolio, orchestrating 30+ projects monthly across digital sales, rewards, and complex core billing systems to ensure strategic value realization.

Spearheaded the 0-to-1 product discovery, established a governance framework, and launched a Generative AI-powered insights platform; utilized Voice of the Customer (VOC) data and journey mapping to reduce Time-to-Resolution (TTR) by 40%.

Orchestrated the swift Go-To-Market strategy for an AI-Based Customer Journey Analyzer, growing to 300+ daily users and cutting case handling time by 70%, resulting in a projected \$6M annual savings.

Directed the integration strategy for a leading CX technology stack (Qualtrics, Sprinklr, Quantum Metric), consolidating complex analytics into a unified servicing platform that increased CSAT and operational productivity by 30%.

- Directed digital operations and release readiness during major high-volume launches (Apple, Samsung), maintaining an experience error rate under 0.5% across web and mobile platforms.

- Collaborated with front-line customer service teams to reduce costs by 40% on the enterprise CRM ServiceNow platform through designing and implementing automated resolution bots that handle customer hardship and loyalty inquiries.

Direct attribution and churn-risk analysis - correlating care contacts with prior digital sessions (same-day, 7/30-day windows) and escalations with attrition signals - feeding root-cause and retention fixes into the roadmap.

- Established a 24x7 Digital Monitoring organization leveraging a proprietary Real-Time Interaction Scoring system to discover customer friction, reducing transaction errors by 52% and securing the CIO Recognition Award.

- Eliminated over 200K annual call center contacts by conducting root cause analysis to pinpoint where customers exited digital-first service paths, then translating those insights into funded, high-impact roadmaps.

Accenture

Senior Product & Governance Lead - JP Morgan Chase
September 2011 - October 2014 (3 years 2 months)

United States - Jersey City

Large-Scale Payment Operations:

Delivered and supported large-scale payment modernization programs processing \$150B+ in daily transaction volume, ensuring the underlying architecture could support massive enterprise scale without compromising uptime.

Strategic Delivery Alignment:

Partnered closely with product managers and architects to analyze core business requirements, assess systemic risks, and shape delivery strategies for robust, high-volume payment platforms.

Modernization Releases:

Led the organizational transition to Lean Agile and modern open-source technologies, successfully launching 10+ major product releases within the Payments Line of Business (LOB) while maintaining uncompromising platform stability and quality.

Cross-Functional & Pre-Sales Partnership:

Teamed up with Accenture Pre-Sales as a core member of the Technical Team for critical engagements across Tier-1 financial institutions like JPMorgan Chase, architecting comprehensive technical project proposals to secure Quality Control contracts for 35+ client applications.

Strategic Scaling & Evangelism:

Drove net-new business acquisition and talent scaling by designing and conducting educational Boot Camps for client managers, successfully staffing over 100 resources across global delivery locations.

Royal Bank of Scotland

Business System Analyst

October 2010 - September 2011 (1 year)

Gurugram

- Drove the QA lifecycle for 6+ web applications using extensive automation techniques with HP Automation suite integrated with JIRA

- Led the design and development of automated health check suite for comprehensive functional health report of end-to-end transactions. This included over 600 API checks, workflow surveillance and Alerts.

Accenture

Software Engineer (CA LISA & QTP)

April 2008 - October 2010 (2 years 7 months)

Bangalore

- Designed and developed Business Process Testing (BPT) assets and implemented Service-Oriented Architecture (SOA) testing using ITKO LISA for non-UI applications (MQ's, Databases, Web services, Unix Boxes), including performance testing.
